Chicago, IL · umangdhawan97@gmail.com · [linkedin.com/in/umangdhawan97](https://www.linkedin.com/in/umangdhawan97) · github.com/udhawan97

PROFESSIONAL SUMMARY

Technology consultant with four years at EY advising Fortune 100 clients across consumer, retail, health, and public sectors, combining hands-on engineering depth — cloud reliability, observability, and quality at scale — with consulting skills in AI strategy, customer service transformation, and go-to-market. Known for translating technical risk into decisions executives can act on.

TECHNICAL SKILLS

AI & Data: Generative AI, prompt engineering, Python, SQL, JavaScript, Power BI, Tableau

Cloud & DevOps: AWS, Azure, Azure DevOps, CI/CD, observability (Grafana, AppDynamics), FedRAMP / NIST 800-53

Engineering & QA: Test automation (Appium, JMeter, Kotlin), distributed systems, performance engineering, release management

Consulting & Delivery: SAFe / Agile, product management, GTM strategy, workshop facilitation, JIRA, Figma, Miro

PROFESSIONAL EXPERIENCE

Senior Consultant — Customer Service Transformation

Jun 2025 – Present

EY Studio+ · Chicago, IL · Consumer, Retail & Health sectors

- Reduced deployment-related incidents by 20% for a Fortune 100 retailer's cloud platform by embedding with engineering teams to tighten release safety protocols, surface pre-deployment risk patterns, and standardize rollback procedures.
- Cut mean time to resolution (MTTR) by 15% by building an observability framework from scratch — structured logs, dashboards, and diagnostic metrics that gave on-call teams actionable signal instead of noise.
- Lowered operational risk by validating major resilience improvements and the retirement of legacy components, simplifying cloud architecture across a customer service transformation portfolio.
- Built contact center AI and technology points of view for two Fortune 500 healthcare clients — spanning capability assessments, tech stacks, and competitive benchmarks — that shaped pursuit strategy and client workshops.
- Drove the practice's go-to-market pipeline by scoring and prioritizing high-value accounts across three sectors and producing executive-ready account strategy materials that shaped leadership and pursuit discussions.

Consultant — Digital & Emerging Technologies

Jul 2022 – Jun 2025

EY · Chicago, IL · Consultant Development Program

- Led quality engineering for an in-store production platform launch across 100+ retail locations, improving order routing efficiency by 30% and cutting bug resolution turnaround by 25% through automated regression testing (Kotlin, Appium) and cross-team triage.
- Built 20+ JMeter performance test scripts and established load benchmarks with engineering teams across the US and India, driving a 15% improvement in shipping API reliability for a major e-commerce launch.
- Supported a zero-audit-finding outcome on a federal government cloud implementation (Microsoft GCC High) by coordinating agile delivery and ensuring FedRAMP and NIST 800-53 controls were executed and verified end to end.
- Accelerated delivery by 20% on a retail digital transformation program by implementing SAFe practices — standardizing ceremonies, backlog management, and release documentation.
- Held concurrent Lead QE, Performance Engineer, and Business Analyst roles across three engagements; nominated Rookie of the Year among 100+ peers and earned three Bravo Awards for impact beyond assigned scope.

IT Leadership Intern — Intelligent Enterprise Business Solutions

Jan 2021 – Dec 2021

SAP America · Chicago, IL (Remote)

- Partnered with the Chief Product Owner to manage portfolio delivery across teams in Germany, the US, and India — tracking OKRs, removing blockers, and keeping product increments on schedule.
- Facilitated design thinking workshops with 50+ cross-functional stakeholders and conducted UX research that informed SAP FlexConnect design decisions adopted by the product team.

CERTIFICATIONS

AWS Certified Cloud Practitioner · Microsoft Azure Fundamentals · SAFe Product Owner / Product Manager · Product Management (General Assembly) · Generative AI for Everyone & ChatGPT Prompt Engineering (DeepLearning.AI, 2026)

EDUCATION

M.S., Information Systems (2022) — Kelley School of Business, Indiana University · Concentrations: Digital Enterprise Systems, Security & Risk

B.S., Informatics, Finance Minor (2020) — Indiana University Bloomington · Dean's Honor List · 4+1 MSIS Program
