PROFESSIONAL SUMMARY

Technology consultant with four years at EY advising Fortune 100 clients across consumer, retail, health, and public sectors. Currently the quality engineer behind deployments, feature validation, and on-call support for four cloud products at a Fortune 100 restaurant chain. Combines hands-on engineering in cloud reliability, observability, and quality at scale with consulting work in AI strategy and customer service transformation, and is known for translating technical risk into decisions executives can act on.

WORK EXPERIENCE

Senior Consultant, Customer Service Transformation

Jun 2025 – Present

EY Studio+, Chicago, IL

- Deliver quality engineering across four cloud services products for a Fortune 100 restaurant chain, managing deployments, validating new feature work, and supporting production through the on-call rotation.
- Reduced deployment-related incidents by 20% by tightening release safety protocols, surfacing pre-deployment risk patterns, and standardizing rollback procedures across the platform.
- Cut mean time to resolution by 15% by designing an observability framework of structured logs, dashboards, and diagnostic metrics that gave on-call teams actionable signals instead of noise.
- Developed contact center AI points of view for two Fortune 500 healthcare clients, covering capability assessments, technology stacks, and competitive benchmarks that shaped pursuit strategy and client workshops.
- Strengthened the practice's go-to-market pipeline by scoring and prioritizing high-value accounts across three sectors and producing executive-ready account strategy materials.

Consultant, Digital and Emerging Technologies

Jul 2022 – Jun 2025

EY, Chicago, IL

- Led quality engineering through the chainwide launch of an in-store order fulfillment platform across 100+ restaurant locations, improving order routing efficiency by 30% and cutting bug resolution turnaround by 25% with automated regression testing in Kotlin and Appium.
- Owned integration testing between two in-store ordering products ahead of launch, after contributing to the redesign of the order taking experience on a new device and rotating to the counter and drive-through tablet team.
- Built 20+ JMeter performance test scripts and established load benchmarks with engineering teams across the US and India, improving shipping API reliability by 15% for a major e-commerce launch.
- Coordinated agile delivery on a federal government cloud implementation (Microsoft GCC High), facilitating cross-team ceremonies, tracking KPIs on feature work, and recommending NIST 800-53 framework requirements.
- Earned three Bravo Awards and a Rookie of the Year nomination among 100+ peers while holding concurrent Lead QE, Performance Engineer, and Business Analyst roles across three engagements.

IT Leadership Intern, Intelligent Enterprise Business Solutions

Jan 2021 – Dec 2021

SAP America, Chicago, IL (Remote)

- Partnered with the Chief Product Owner to manage portfolio delivery across teams in Germany, the US, and India, tracking OKRs, removing blockers, and keeping product increments on schedule.
- Facilitated design thinking workshops with 50+ cross-functional stakeholders and conducted UX research that informed SAP FlexConnect design decisions adopted by the product team.

EDUCATION

M.S., Information Systems (2022), Kelley School of Business, Indiana University | Concentrations: Digital Enterprise Systems, Security and Risk

B.S., Informatics, Finance Minor (2020), Indiana University Bloomington | Dean's Honor List, 4+1 MSIS Program

SKILLS

AI and Data: Generative AI, prompt engineering, Python, SQL, JavaScript, Power BI, Tableau

Cloud and DevOps: AWS, Azure, Azure DevOps, CI/CD, Grafana, AppDynamics, FedRAMP, NIST 800-53

Engineering and QA: Test automation (Appium, JMeter, Kotlin), distributed systems, performance engineering, release management

Consulting and Delivery: SAFe, Agile, product management, go-to-market strategy, workshop facilitation, JIRA, Figma, Miro

Certifications: AWS Certified Cloud Practitioner; Microsoft Azure Fundamentals; SAFe Product Owner / Product Manager; Product Management (General Assembly); Generative AI for Everyone and ChatGPT Prompt Engineering (DeepLearning.AI, 2026)
